

PULMONARY MEDICINE

The Department Of Pulmonary Medicine was established in 1990 . Presently teaching is being imparted to undergraduate students doing MBBS course . Teaching is in form of bedside clinics , classroom lecturers , tutorials & workshops.

Postgraduate MD course is likely to commence in next academic year subject to MCI approval .

Salient Features :

There is adequate faculty in the Dept. Pulmonary Function testing & bronchoscopy is being done . We are part of GAIL's Air Pollution Related Respiratory Diseases Diagnostic Center . We also have a well equipped ICU for intensive respiratory care with invasive & non invasive ventilators.

DOTs is being imparted under RNTCP. We have a special asthma clinic & smoking cessation clinic being conducted weekly .

Ongoing Research Projects:

- 1) Evaluation of efficacy of DOTs in the Medical College setup. With special ref to patient compliance , drug toxicity , relapse.
- 2) Morbidity profiling of Pune Citizens with special reference to Air Pollution Related Respiratory Diseases through the APRRDDC (Air Pollution Related Respiratory Diseases Diagnostic Center) sponsored by GAIL.

Air Pollution Related Respiratory Diseases Diagnostic Center

Faculty members have numerous publications in various national journals & have attended large number of national conferences. They have received special training in Pulmonary function testing, DOTs & Bronchoscopy .
