## Best Practices 2021-22

### 1. Compression Only Life Support (COLS)

#### 1) Objectives

Awareness and training of general public about saving a life

#### 2) The Context

To gather more no of general public we did this activity in crowded areas like OPD, waiting area etc.

#### 3) The Practice

This activity makes each person a life saver Hands on training of COLS on manikin can help a layman to save a life emergency till medical help arrives.

#### 4) Evidence of Success

During this activity we received positive feedback from public as few of them have performed COLS for their loved ones and saved their lives.

## 5) Problems Encountered

Manikin needed to give hands on training to general public

## 6) Any other information regarding Institutional Values and Best Practices which the institution would like to include.

COLS has proven its worth in saving a life till patient reaches hospital hence public awareness about the same is absolutely necessary and to be practiced regularly is the motto of our department and specialty.

## **2. Bone library**

### **1) Objectives of the Practice**

Providing real human bones for study during practical teaching in the department

### **2) The Context**

Bones are important learning resource in Anatomy. With less number of real human bones available to the MBBS students learning osteology becomes challenging. Artificial bones do not show all the features.

### **3) The Practice**

Department has good collection of real human bones available for students to borrow for study during tutorial/practical. Students can use the bones and return it back before leaving the department.

### **4) Evidence of Success**

Increasing trend in borrowing the bones for study during tutorial.

### **5) Problems Encountered**

More number of bones needed.

### **3. Clinical audit of lab & radiological investigations done in medicine wards**

#### **1) Objectives**

1. To minimise ongoing number of unindicated investigations
2. To minimise financial burden to patient and decrease load of laboratory

#### **2) The Context**

1. Not letting residents to know about Project
2. Case discussion with treating physician

#### **3) The Practice**

1. During discharge all investigations will be evaluated and checked with clinical diagnosis on discharge.
2. List of investigations which could have been avoided or postponed in done.

#### **4) Evidence of Success**

1. Investigations for e. g. CXR in AGE could be avoided or not indicated.

#### **5) Problems Encountered**

Manpower shortage
