

DEPARTMENT OF DERMATOLOGY, VENEREOLOGY & LEPROSY

The department caters to the problems related to skin as well as venereal diseases and leprosy. It is well equipped to cater to the patients' needs specially related to aesthetic dermatology.

We have the latest machines in the field of lasers viz. Diode laser for hair removal, Q switched NdYAG laser for pigment and tattoo removal and a Fractional CO₂ laser for skin resurfacing and ablation. Various other procedures such as cryotherapy, radiofrequency surgery, chemical peels, microdermabrasion, PRP and vitiligo surgeries are carried out. There is also a Phototherapy unit with ultraviolet A and narrow band ultraviolet B light facilities.

The department has well trained and qualified staff to provide the above services as well as carry out undergraduate and postgraduate teaching in the subject.
