

Bharati Vidyapeeth (DU) Medical College, Pune

Department of Immunohematology & Blood Transfusion

Marking a significant advancement in our mission to deliver exceptional Healthcare at Bharati Hospital and Research Centre

The Department of Immunohematology & Blood Transfusion performed its first Pediatric Peripheral Blood Stem Cell Harvest in an 11-month old child in the PICU on 04 March 2024. The collected product was used for his sibling, a 6-year-old suffering from Pre-B cell ALL. We got an excellent Stem cell count and the product was successfully transfused to the patient on the same day.
